BRENNAN MARTIN

San Diego, CA / Portland, OR | (503) 250-0248 | brennankingmartin@gmail.com
linkedin.com/in/brennanmartin04 | github.com/BrennanKM | BrennanKingMartin.com

Business Analytics senior and founder who sells, scopes and ships. Founded EarnVouch (live on the App Store), co-founded JuniorJobHunt ($16,000 in pitch-competition grants), has run a contracting business since 2020 ($100K+ revenue), and builds software and multi-agent workflows with AI agents every day.

EDUCATION

University of San Diego, Knauss School of Business | *San Diego, CA* Expected May 2027
B.A., Business Analytics | Minor: Entrepreneurship | Dean's List, Second Honors (2023–24)
Relevant coursework: Descriptive Analytics & Data Management (R, Python, SQL); Analytical Decision Modeling; Marketing Analytics; Business Analytics; Global Marketing; Financial Management; Business Law

University of New York in Prague | *Study abroad, Prague, Czech Republic* Fall 2025

VENTURES

EarnVouch | *Founder; owner of Martin Ventures LLC* Oct 2026 – Present
- Took a free iPhone app for students 14–24 from an empty folder to **the App Store in a month** (Nov 2026): a client-confirmed record of gig work they can share with colleges and employers; passed Apple's review on the first submission
- Stack: TypeScript monorepo, Expo / React Native, Fastify, PostgreSQL + Drizzle; passkeys (WebAuthn), Apple App Attest, signed App Store JWS, AES-256-GCM field encryption and a restore-proof deletion journal
- Built for minors' data: verifiable parental consent (Stripe Identity), Apple's Declared Age Range API and COPPA retention rules; Azure AI Content Safety screening, then a human on every report
- Wrote the product spec (**227 documented decisions**, 24 architecture decision records), a 39-point threat model and the data model; 5 security reviews, 4 rounds of legal review, Playwright and Maestro end-to-end tests

JuniorJobHunt Inc. | *Co-Founder & CEO* Winter 2023 – Present
- Co-founded a platform connecting young adults with local gig work (began as a USD class project); won **$16,000 in grants**
- Designed the operations backend and now build it solo with AI agents: live site → Cloudflare Workers (forms and matching logic) → Airtable → automated email
- Wrote end-to-end systems documentation and process flowcharts used to onboard team members
- Incorporated as a Delaware C-Corp with The Brink SBDC's support; managed advisors, budget and a dev partner; pre-launch

AI IMPLEMENTATION

- **Build with AI coding agents every day.** Work as the product owner: write the spec, let the agent (mostly Claude Code) write the code, then review and test it. Shipped this way: web apps and PWAs, Cloudflare Workers backends, client websites, and an iPhone app now live on the App Store
- **Multi-agent pipelines.** Designed a production line where research agents write a product spec each morning, a scheduled job renders the files, and Claude checks the output and drafts the listing, with a human approval gate before anything goes public
- **Connecting agents to real tools.** Use MCP connectors (Gmail, Google Drive and Calendar, Canvas LMS, Canva) and browser automation so agents work inside real day-to-day systems, and run scheduled agent tasks, including a nightly job that pulls deadlines, checks for replies on open job applications and updates a personal knowledge base
- **Context and memory design.** Built a structured knowledge base (Obsidian) that every agent session reads first, with written operating rules: email is draft-only, no secrets in synced files, and nothing is published, bought or deleted without approval
- **Verifying agent output.** Check agents' self-reported results against the actual files, after catching an agent system reporting files and quality checks that didn't exist
- **AI for analysis.** Built a mapping tool with AI for a legislative campaign, cleaned and restructured 3 seasons of business records, and built reporting that changed where the contracting business spends its time

EXPERIENCE

Owner-Operator, Independent Contracting | *Portland Metro, OR* June 2020 – Present
- Run a seasonal junk removal, pressure washing and land clearing business; **$100K+ in revenue since 2020**, including about **$40K in Summer 2026 (over $30K profit)** with a team of 3
- Completed 40+ projects a summer (2023–26) at an average of **$121.68/hour**, tracked in spreadsheets since the first season; in Summer 2024 alone, hauled 20 tons of refuse and cleared acres of blackberries
- Win, scope, price and negotiate multi-day contracts **up to $15,000**, including large-scale land clearing; hire and supervise temporary crews
- Built **100+ returning clients** through door-to-door outreach, Nextdoor and a referral bonus program
- Used revenue per hour by service line to move marketing and crew time toward land clearing, the highest-paying service
- Handle every step, from outreach and quoting through the work, invoicing and follow-up

Freelance Web Designer | *Wilsonville / Tualatin, OR* Jan 2026 – Present

- Target local businesses that already pay for ads but run weak websites, a better lead filter than businesses with no site
- Built 5 demo sites with AI coding agents and pitched each owner in person; **signed 2 paying clients (40% close rate)**
- Wrote proposal and terms-of-service templates with two pricing models, plus a Spanish-language version
- Pitched a restaurant on a brand refresh: rebuilt its logo as a vector file, made a brand board, a print-ready one-pager and an Instagram mockup

Vacation Rental Manager, King Tide Seaside | *Seaside, OR (remote, part-time)* Feb 2025 – Present

- Managed the launch of a coastal vacation rental for its owner: wrote the Airbnb listing, built the website and branding materials, and wrote the house manuals
- Planned the guest experience, including which amenities to add

Official, USD Campus Recreation | *San Diego, CA* Spring 2026

Sales Associate, Nordstrom Rack | *Clackamas, OR* Apr 2021 – July 2021

General Labor Assistant, Absolutely Floored Inc. | *Tualatin, OR* Jan 2018 – Dec 2020

- Built residential fences, decks and outdoor spaces; calculated measurements and lumber cuts and helped order materials

PROJECTS

Field-Service Business Analytics App | *Personal project* Summer 2026

- Cleaned and restructured 3 seasons of job and client records, then replaced the spreadsheet workflow with a mobile web app (PWA): client directory, scheduling and job-actuals logging; used daily in the field
- Built reporting on revenue by month and service line, $/hour by service, top clients and year-over-year change; it showed land clearing paid best and drove the shift toward it
- Wrote a rules-based keyword classifier that sorts free-text job descriptions into five service categories for reporting

See a Send a | *Chapter web app* Sept 2026 – Present

- Built and launched a home-screen web app (PWA, Supabase) for the DSP chapter: photo tagging, leaderboards, push alerts
- 17 members, 15 posts and 10 push subscribers in the first two days; **50+ active users** by Oct 2026

RunsOnDopamine | *Multi-agent product pipeline* Oct 2026 – Present

- Designed a multi-agent production line for an Etsy digital-product shop: research agents write a product spec each morning, a scheduled job renders the PDF and listing photos, and Claude checks the files and drafts the listing
- Every publish and ad dollar needs human approval; the line builds finished products unattended; 34 listings built

Legislative Appointment Campaign, Oregon House District 26 | *Volunteer, Data & Research* Jan 2025

- Built a mapping tool with AI overlaying county lines on district boundaries; matched precinct committee members against public records

LEADERSHIP

Vice President of Chapter Operations, Delta Sigma Pi | *Lambda Pi Chapter, University of San Diego* Jan 2026 – Present

- Run operations for a 50+ member co-ed professional business fraternity chapter: meeting and event logistics, scheduling, event registrations, and the trackers and shared documents behind them; member since Fall 2024
- Represented the chapter at the Delta Sigma Pi Western LEAD Provincial Conference

Campus AI Leadership Council, BoodleBox | *Remote* Dec 2024 – Mar 2025

- Selected as one of ~47 students nationwide for the student council of BoodleBox, an AI platform for higher education
- Promoted the platform at USD and shared student views on classroom AI with company staff

AWARDS & HONORS

1st Place & $15,000 Grant, USD Fowler Business Concept Challenge (200+ applicants) Nov 2023

Finalist & USD Representative ($1,000 grant), Global Social Innovation Challenge May 2024

Top 5 Finalist, San Diego Startup Week Intercollegiate Pitch Competition Oct 2024

Top 5, Global Student Entrepreneur Awards (GSEA), San Diego competition Feb 2025

Dean's List, Second Honors, University of San Diego 2023–24

Oregon All-State Band, Tenor Saxophone, 2nd Chair Dec 2018

ACTIVITIES & VOLUNTEERING

USD Club Lacrosse, Player 2023 – Present

American Red Cross, Volunteer, Portland, OR: weekend support at blood donor centers Winter 2021–22

H.O.P.E. Food Pantry, Volunteer, Oregon City, OR: stocked shelves and prepared hot meals Recurring

SKILLS

AI & agents: Claude Code and LLM agents; multi-agent pipelines; MCP connectors; browser automation; scheduled agents
Data & analytics: R (RStudio), SQL, Excel, JASP, Python (basic)
Web, mobile & automation: TypeScript, React Native (Expo), Fastify, PostgreSQL + Drizzle, HTML/CSS, Cloudflare Workers, Supabase, Airtable, Make.com, GitHub, Netlify, PWAs
